

SAFE WATER INTERNATIONAL MINISTRIES

WATER FACT:

Every day 25,000 people die from disease related to water.

No wells...only small streams to collect water from...

Recently, the Magkie Foundation International, Inc. purchased 12 chlorine producing units (CPUs) from SWIM. Two are reserved for medical clinics in Liberia, while the remaining ten are being distributed to people in remote villages in Liberia.

Because there are no wells, but only small streams as their source of water, the villagers in these remote areas are extremely happy and excited to receive the CPUs, so they too can have clean, safe water.

Pastor Abraham Alexander Woto received CPU training and has begun distribution of the equipment. Pastor Abraham is working with pastors to use the CPU and chlorine to reach residents for Christ. People come to church for the chlorine and receive the Gospel message at the same time.

Pastor Abraham rides to the end of the road and then has to walk an additional 4-6 hours to reach these people. Pastor Abraham said that after walking for 4-6 hours, even the clothes on his back feels heavy!

Will you help distribute more CPUs to additional remote villages in Liberia?

Two SWIM team members (Earl Ratcliff and Lorn Heyne) are hoping to travel to Liberia this summer (possibly June) to deliver 20 more CPUs to people in other isolated areas to help them have clean, safe water and share the love of Jesus with them. While there, Earl and Lorn will install an automatic injection system in the medical clinics water supply.

battery and solar panel together is \$250. So the total amount needed is \$5000 [20 CPUs x \$250 (cost of a battery and solar panel) = \$5000].

Will you give to SWIM to help purchase the batteries and solar panels that are needed? Consider how easy it is for you to get clean, safe water – walk up to the faucet and turn it on! Your contribution will make a huge difference! It will help people in their everyday lives – and for eternity because they will hear about Jesus, the Living Water!

The team is presently raising money for batteries and solar panels to go with each of the CPUs. The cost of a

Please make your contribution today! Thank you!

Sharing SWIM's Mission with Students in India

In India, students were excited to learn more about SWIM's mission of safe, clean water, along with discipleship training. One team member commented how these are future generations learning about Jesus and safe water which they can follow and share with the next generation!

Girls Getting It Done!

A group of girls in Malawi got together and made chlorine to distribute around the villages so that people could disinfect their hands and water during this hard and difficult time of COVID-19.

Pumping By Hand at an Outdoor Pump

For most homes in the United States, getting a drink of water is as simple as turning on a faucet which is indoors. In Malawi, pumping by hand at an outdoor well is required.

Since safe, clean water is not readily available, SWIM teams have been distributing chlorine producing units (CPUs) to community members so they can purify the water, wash their hands, and disinfect their households.

We appreciate your support! Thank you!

Safe Water International Ministries (SWIM) is a nonprofit 501(c)3 ministry. Your gift is tax deductible.

Thank you!

As a ministry, it is SWIM's desire to make the CPUs available to as many people as possible. Your donation helps SWIM share the Gospel while creating safe water.

Your contribution today can help purchase the batteries and solar panels needed to go with the CPUs.

Your Contributions ARE Making a Difference!

The following email was recently received by Juma, a SWIM team member in Uganda.

Hello greetings to you!

The Lord has given us another opportunity to share the Gospel. I have been able to get ten pieces of solar panels and batteries and solar charger controls. We now have another opportunity to reach out to ten more communities with CPUs.

I am also happy that the churches planted through sharing chlorine in the communities are all doing well. They survived during the lockdown and they are healthy.

Thank you so much for supporting the body of Christ here.

Have a blessed day,
Juma
