

**SAFE WATER  
INTERNATIONAL  
MINISTRIES**

August 2021

### **Can you imagine...will you help?**

A large chlorine producing unit (CPU) was received and is being used by a public health officer in the Lunganyiro (Kenya) health center to produce chlorine for the facility.

Health volunteers are being trained so they can help others learn how to use the chlorine to treat their water. Making their water safe will help protect them from dangerous water-borne diseases, like typhoid, which has affected people in the area.

"Thanks to Jesus," said one SWIM team member for this life-changing gift!

Even though they are still in lockdown, he added, "The SWIM ministry is ongoing as we continue to share the Gospel of our Lord Jesus Christ." Praise the Lord!

Can you imagine: people suffering from diseases because of unsafe water and how a simple CPU can be life-changing...

Will you help: your gift (of any amount) will literally make a life-changing difference! Thank you!

\*\*\*

## **Request Received from the *Liberian Government***

A few months ago, we mentioned that Earl Ratcliff and Lorn Heyne were planning to travel to Liberia to deliver 50 more chlorine producing units (CPUs) to people in isolated areas to help them have clean, safe water and share the love of Jesus with them. The trip, unfortunately, has been postponed.

Even though the trip had to be postponed, [the distribution of CPUs still continues. And funds are still needed to cover the cost of the batteries and solar panels which are used with the CPUs to make the chlorine.](#)

The total cost of 50 batteries and solar panels is \$12,500 [50 batteries and solar panels x \$250 = \$12,500].

In Liberia, the need for clean water is great. We received this message from one of the SWIM team members in Liberia: "According to Pastor Abraham Woto, he was contacted by the superintendents from the prison to help provide safe drinking water for thousands of inmates. So, yes the government is making the request. There is a need to supply 14 CPUs to correction centers in Liberia."

People in Liberia are suffering. We can help relieve some of that suffering with the gifts of CPUs which create clean water. One CPU can serve a small village. Will you help us transform lives? Your generous gift today will do just that!

## **Suffering for a long time...**

In the community of Suo (Kenya), the people have been suffering for a long time because of water-borne diseases. But now more than 500 households, plus the neighboring school, are being blessed because they have received a SWIM chlorine producing unit (CPU)!

Your support has allowed the gift of a CPU to make this transforming difference! Thank you!

\*\*\*

**Water fact:** Water-borne diseases are preventable!

\*\*\*

## Dynamic Generosity!

Your generosity has a powerful impact! Imagine the brightest smile you've ever seen and eyes full of hope that simply light up the day...then you're close to what the faces look like of those who have received the gift of safe water through a SWIM chlorine producing unit (CPU)!

Your support makes an immeasurable impact. Together we share the hope of Jesus and help them improve their daily lives.

Consider this:

The cost of one CPU is \$100; the cost of a battery and solar panel to go with the CPU is \$250.

### ***IF...***

4 people gave \$25:  $4 \times \$25 = \$100$  – the cost of one CPU is covered!

4 people gave \$62.50:  $4 \times \$62.50 = \$250$  – the cost of the battery and solar panel is covered!

2 people gave \$175:  $2 \times \$175 = \$350$  – the cost of one CPU, battery, and solar panel is covered!

2 people gave \$350:  $2 \times \$350 = \$700$  – the cost of two CPUs, batteries, and solar panels is covered!

Thank you for your partnership in creating this transformation as people are told about the love of Jesus and receive the means to make their water safe!

Here's how to give:

- Mail a check to: SWIM, PO Box 227, New Sharon, IA 50207
- Online: <http://swimforhim.org/donations/>
