### *Imagine ...*

Accepting Jesus as your Savior and wanting to go to church to worship and be with other believers, but you were unable to walk. What would you do?

A team of youth from one of the churches in Uganda was sharing about Jesus as they distributed chlorine to different communities in their area.

Kisakye Joy heard the Good News gave her life to Christ! But – she is not able to walk, so *she crawled to church!*

Having lost her husband when she was pregnant, she and her little daughters presently live in a tiny house.

This church is now praying for a wheelchair for this special lady, so she doesn't have to crawl in the dust (or in the mud during the rainy season). A wheelchair will also allow her to get around in the community.

*Will you join us in praying for a wheelchair for Kisakye Joy? Can you help in some way?*

### *Imagine ...*

Being a pastor but only having an *incomplete, dilapidated Bible?*

To celebrate his birthday, Juma, one of the Ugandan SWIM team members, wanted to do something that honored the Lord. He knew of a pastor whose Bible was missing all of Genesis up to Exodus chapter 15, Jude, and Revelation.

Smiles and heartfelt gratitude were experienced as Juma presented Pastor James with a *complete, new Bible!*

Juma shared his birthday prayer: "My Lord Jesus, I have a reason to appreciate You for loving me and making me a vessel to minister to at least one person. Give me another opportunity, Lord. I am the clay. You are the potter. Glory to God!"

### *Imagine ...*

Being a believer in Jesus but not having a Bible at all to read.

Meet Phalesi is from a small village in Malawi. She was gifted a Bible of her own and from the day she received it, **the Lord has been using her** to share Bible stories with her children and encourage others in the community.

Phalesi also helps to share the Word of God when helping to distribute chlorine in the community. She is able to do this because of the Bible she was given!

### *Imagine ...*

The PURE JOY of people when they are given a chlorine producing unit that allows them to create safe, clean water! This is a gift that loves unconditionally and transforms communities immensely one life at a time!
