

## **What do you need?**

### **Do you have food and clean, safe water?**

Many people in our world do not. Many get their water from unsafe sources causing many waterborne diseases. SWIM is helping to change that by distributing chlorine producing units (CPU) which are helping to create clean, safe water.

### **Do you have easy access to the Word of God?**

Many people do not have a copy or even access to a Bible. SWIM is trying to change that, so that the Word of God is shared all over the world.

This couple in South India was given their own Bible.

These people in Mozambique received their first Bible.

### **How the "United States SWIM Team" is sharing the Gospel**

Several members of the United States Safe Water International Ministries (SWIM) team are traveling this month to meet this need of creating clean water and sharing the Gospel.

Rich Grant is already in India/Nepal and will be there a month. He is delivering 100 chlorine producing units (CPUs) to make chlorine in distribution centers. He is also carrying a couple microscopes to show the living creatures in untreated water that cause illness.

Earl Ratcliff and Lorn Heyne will be in Liberia and Guinea November 10-21, training on the use of the CPU and installing an automatic chlorine injection system into the water supply at a medical clinic.

John Battern and his wife Julie will be on a mission trip in Guatemala in November as well. They will carry a CPU and look for an opportunity to share it while there.

## How do you share the Gospel with others?

These men are "SWIM Champions" from Zambia. They ride their bikes many miles to share the love of Christ with those in their area.
